

devNext Upgradation

Last edited by [Reddy, Viswanatha \(V.P.\)](#) 3 months ago

Prerequisites:

- **python3** in the wiki indicates python version-3.x or above.

Upgrading devNext

To upgrade the devNext to the Latest Version please run the following Command from your CLI.

```
dn update
```

Example:

(or)

Command to install devNext Ubuntu

```
python3 -m pip install --upgrade devNext --extra-index-url https://jfrog.sofia.visteon.com/artifactory/api/pypi/pypi-virtual/simple --trusted-host jfrog.sofia.visteon.com --no-cache-dir
```

Command to install devNext Windows

```
python -m pip install --upgrade devNext --extra-index-url https://jfrog.sofia.visteon.com/artifactory/api/pypi/pypi-virtual/simple --trusted-host jfrog.sofia.visteon.com --no-cache-dir
```

! **Note:** To upgrade to Particular Version.

```
python3 -m pip install --upgrade devNext==_._.* --extra-index-url https://jfrog.sofia.visteon.com/artifactory/api/pypi/pypi-virtual/simple --trusted-host jfrog.sofia.visteon.com --no-cache-dir
```

Example:

! **Note:** **python3** indicates the binary name to access python version-3.x or above.

- If **python** or **py** is being used to access python version-3.x or above in the terminal, replace **python3** in the above commands correspondingly.

Currently PIP packages are available in Locations:

- bangalore
 - chennai
 - mexico
 - sofia
