

How to Unregister Ubuntu Distribution using Command Prompt?

Last edited by [VREDDY10](#) 2 years ago

Note: The below procedure will unregister the distribution and **deletes the complete Ubuntu distribution**.

1. Open Windows Command Prompt *Windows key + R*

2. Perform the below step in the command prompt to see the list of all available WSL distributions installed in your system.

```
wsl -l -v
```

Example:

The below images show us this list of all available distributions after running the above command.

3. To unregister the

WSL distribution perform the below command. This will unregister the distribution and **deletes the complete Ubuntu distribution**.

```
wsl --unregister <DistributionName>
```

4. If you want to install the Ubuntu distribution again, please follow the steps from the following Wiki: [How to Setup WSL2 Distribution](#)
